Objective:

Motivated team player, with a passion for problem solving. My programming experience has driven me on learning many different technologies including Javascript, GraphQL, Redux and many others. I possess a creative input that takes as a priority the delivery of readable code and the production of ready, high quality products. My communication skills in Spanish, English and French are useful in sharing of ideas and tasks for a well polished team environment. I hope to be able to share my skills with a team that values their clients.

Strengths:

- Proficient in HTML5, CSS3, Javascript ES6
- Acquainted with ReactJS, React-Native, Redux, NodeJS, Express
- Knowledge in Gulp, GraphQL, MongoDB, Firebase
- Familiar with Bootstrap, jQuery, Webpack, NPM
- Trilingual: English, Spanish, French
- Learning Jest and Blender
- 1400 + chess player
- Lego aficionado

Education:

- Bachelor's of Fine Arts: Academy of Arts University

- Bachelor's of Computer Sciences(not finished): University of Puerto Rico

- freeCodeCamp, Udemy, Codecademy: Certificates

Experience:

- **Builder's First Source, Dallas, TX**
  oct/2019 - present
  Delivering quality in house products that helped the business and improved the development. Using react and redux we created an inventory desktop and PWA app. Being part of the initiative of a web component catalogue with storybook, react, redux, sass, jest, yeoman, gulp, style dictionary was a valuable addition to the development team tool set.

- **Sngular, Dallas, TX**
  may/2019 - oct/2019
  As part of the architecture I helped build a web components catalogue with a component generator to help the developers achieve the desire functionality and look and feel of the client's (banks) application.

- **Everis, Dallas, TX**
  may/2018 - may/2019
  Designing and developing new features for an internal app that facilitated bankers to originate accounts and credit cards. I was part of the team that worked on the Balance Transfer and ACH product handling sensitive data and realtime transactions improving app's speed and security.

- **Indigo LLC, San Francisco, CA**
  feb/2015 - may/2018
  Develop of a crowdfunding app using React, React-Native to render the view and Redux to manage the state of the data with Firebase as the database. Plaid was use to manage the credit card/bank of the user.
